  - Sweden (Police)
  - USA (LA Police, Chicago, others)
  - Singapore (Border control)
  - Poland (Police BOR)
  - Ecuadorian Presidential Guard

# Chembayo – Scenario #1

## Israeli Police Special Unit

- Each soldier carries a black hood in his vest.
- During operational activity, in case atmosphere becomes toxic, soldier used the hood and continue his mission / calmly and thoughtfully aborts.
  - Tear Gas returned
  - Sudden fire
  - Suspicion of toxic gas.

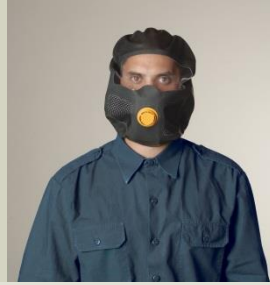

# Chembayo – Scenario #1

## Singapore Transportation Security

- Each security person carries a hood on his belt for the following:
  - Terror Attack.
  - Fire / Smoke.
- Hood allows time to think and act calmly and wisely.

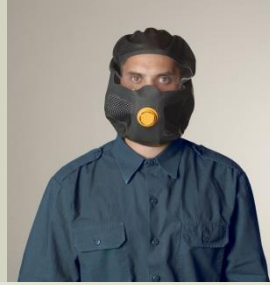

# Chembayo – Scenario #3

## Federal VIP Protection

- Each security person carries a hood on his belt for emergencies. Inner circle carries two.
- When respiratory emergency procedure enacted, inner circle dons the hood on the VIP, and evaluates for evacuation.
- Hood buys time when toxic atmosphere is present. Allows rapid evacuation inside buildings.

# Chembayo – Protecting our people

## Advantages of hoods in emergency situations

- Reduces danger factor from atmospheric toxic agents (smoke, terror, accident involving chemicals)
- Greatly hastening response time in relevant scenarios
- Buys time, enables calculated tactics
- Enhances independency from first responders
- Reduces danger to intervention team and VIPs
